

Household water filter

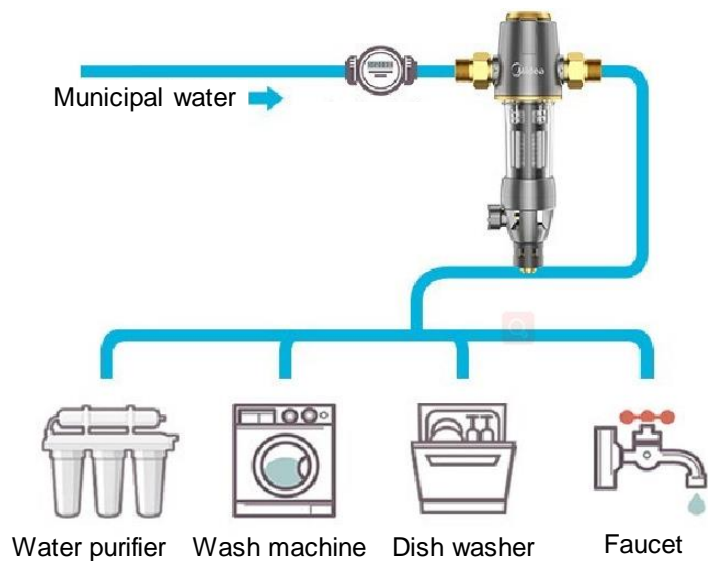

Pre filter (QZBW20S-12)

What the pre filter can do?

As the first filtration of your house, the pre filter can eliminate the sand/rust/particle inside the water, protect the whole house appliance.

Midea Pre filter main feature

1. 40 micron filter mesh, made of 316 stainless steel.

---The 40 micron mesh can eliminate the particles and sand inside the water, and won't get stuck at the same time.

2. Environmental friendly material

---The lead free copper adaptor has a good corrosion resistance and has a long life span. The 316 SS filter mesh do not need to change in the whole lifetime.

Lead free copper adaptor

Midea Pre filter main feature

3. Up to 3t/h big flow (50L/MIN)

---Big flow capability can meet the water demands for your whole house, no need to wait.

4. Real time water pressure display

---With the water pressure gauge at the top, it very easy to check the water pressure.

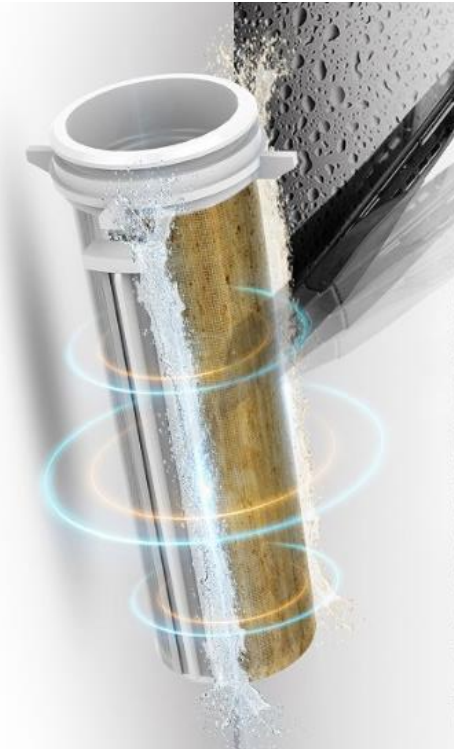

Midea Pre filter main feature

5. Double side cleaning design

---The clean part will sweep around the OD of the stainless mesh and the ID of the transparent bottle, cleaning both side of the pre filter.

6. Reverse flush design

---When you turn on the reverse flush switch, the filtered water will flows opposite direction to flush away the impurities outside the mesh.

Midea Pre filter main feature

Model	QZBW20S-12
Water source	Municipal water
Filter accuracy	40 micron
Flow rate	3T/H
Dimension	165*75*278mm
