WATER DISPENSER TOP LOADING

Product details:

Child lock for safety

Ultra-high water dispensing area

Large capacity Drip Tray

WATER DISPENSER TOP LOADING

Option: PCB indicator

1000mm

Option: decorative part

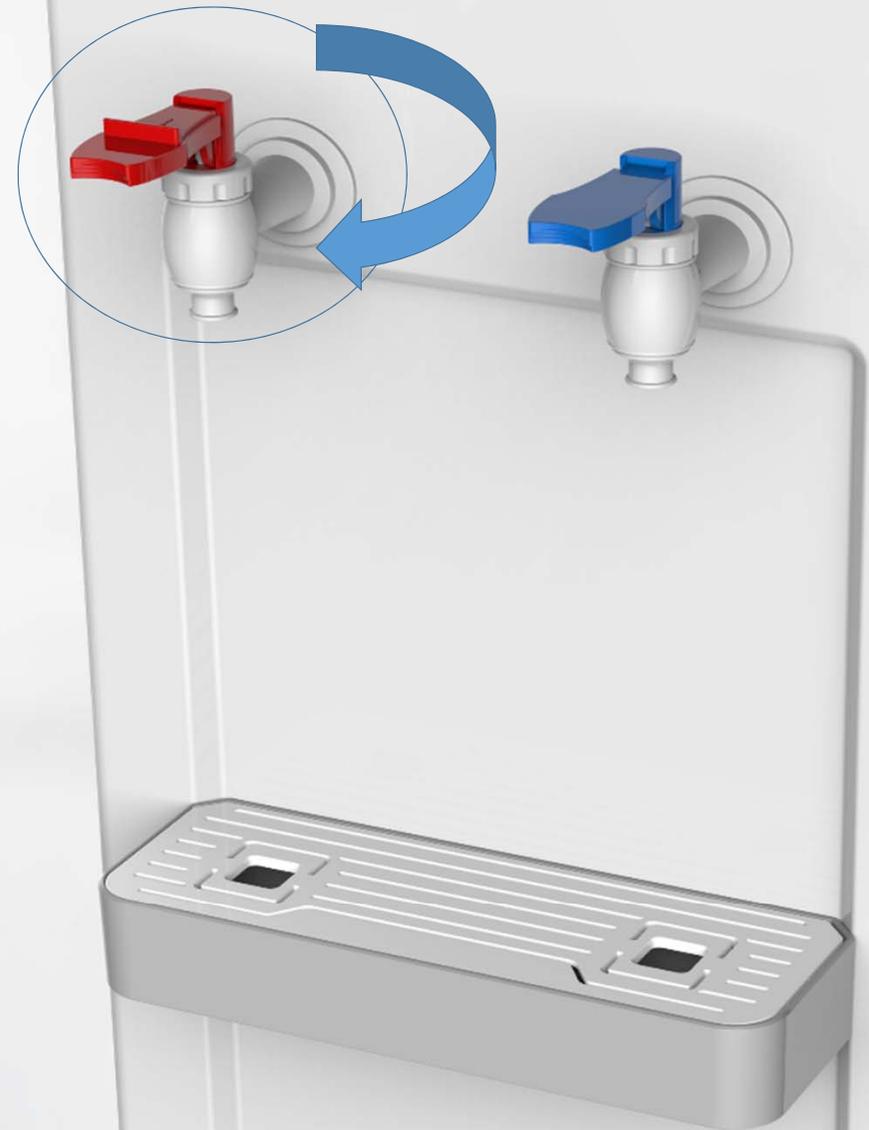

WATER DISPENSER TOP LOADING

The product is higher than the A platform product.
Large condenser, better heat dissipation performance

WATER DISPENSER TOP LOADING

- Easy cleaning
- Match a variety of faucets

WATER DISPENSER TOP LOADING

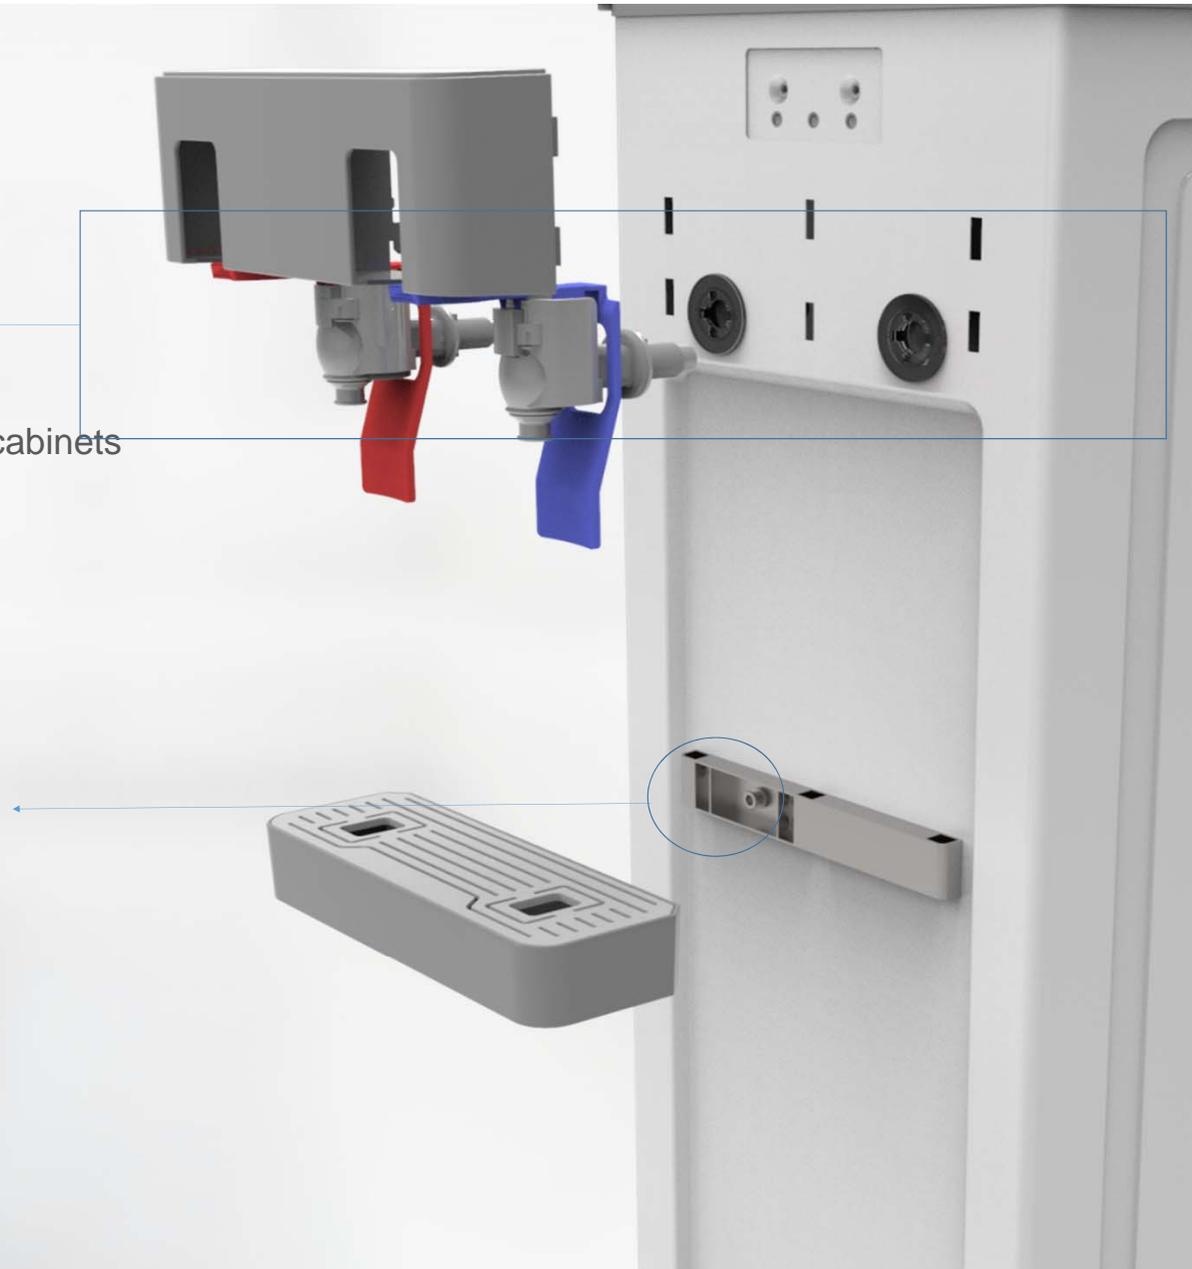

- **Removable Design**

Faucet is packed separately, and the volume of cabinets is greatly increased.

Loading capacity +15%

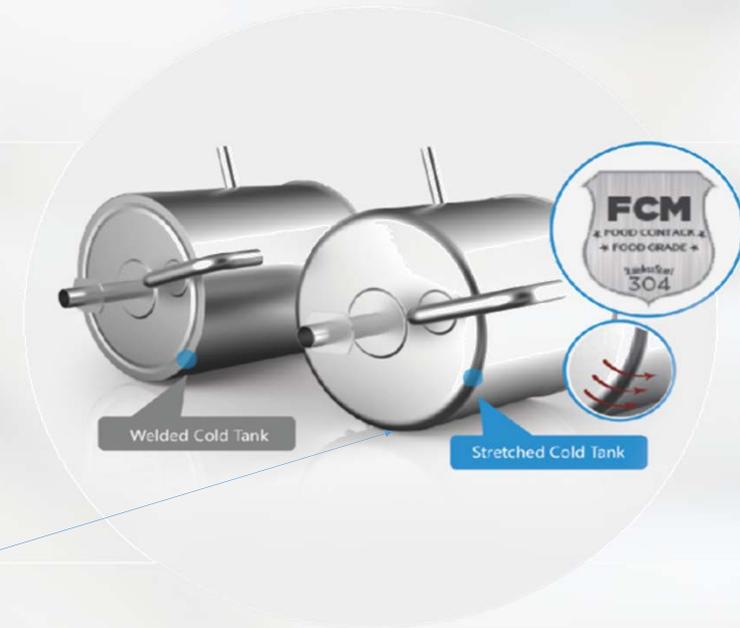

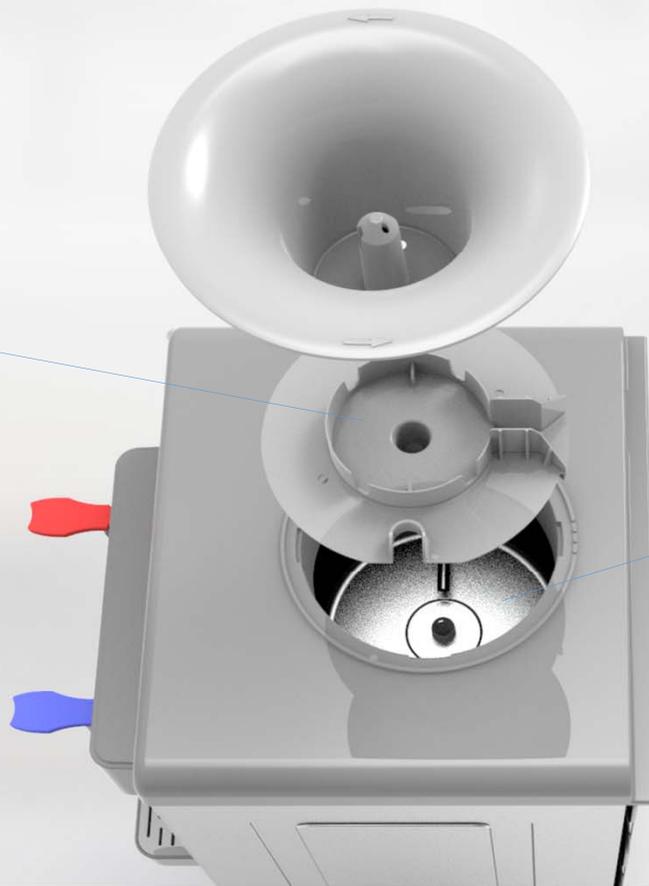

- **Drainpipe**

Hidden drainpipe that can be drained from the front without having to move the machine multiple times to drain from the back (remove the drip tray to drain).

WATER DISPENSER TOP LOADING

Easy cleaning and maintenance by removing the bottle supporter and separator (Stretched Stainless Cold Tank can be easier to clean without cracks)

WATER DISPENSER TOP LOADING

No middle supporting plate, no back cover design, after removing the condenser, the internal space is very large, can be convenient for maintenance.
