Leakage from bottle supporter	Broken bottle	Replace it with a new bottle
Noisy operation	Not placid installation	Place the machine on placid & solid surface

H: CLEANING

To avoid accident, cut off the power supply before operation according to the following instruction

1. The machine had been disinfected before departed from factory

Cleaning the dispenser prior to installing a full bottle of water for the first time

2. Cleaning and draining instruction:

- Before cleaning, make sure the power switch in the O(off) position and unplug the water dispenser.
- Vertically insert the bottle into the supporter on the top of the machine
- Turn on all the taps in turn for 3 minutes after the water outflow, which completes the internal pipeline flushing
- Removed the water bottle from the dispenser
- Place a large bucket beneath the drain outlet. Remove the drain cover and allow water to drain
- After cleaning, replace the drain cover and you can use the machine.

Attention: The dispenser heats water to a temperature of approximately 85°C. It can cause severe burns. Please operate it carefully.

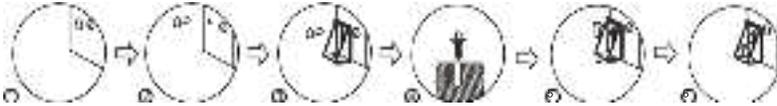

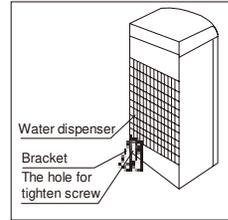

3. To remove mineral deposits:

Mix 4 Liters of water with 200g citric acid crystals, it would be best to put into an empty bottle to help flow through the taps, rinse with clean water two or three times. Generally, this should be done every six months.

Never disassemble this machine by yourself to avoid danger from damaged machine

I: MACHINE INSTALLATION

- 1-2. Loosen the screw of the left bottom angle just as the picture shown.
3. Use the screw to fix the bracket on the left bottom angle of the water dispenser.
4. Make a hole on the floor's or the desk's surface where the water dispenser will be installed.
5. Fix the bracket on the floor by screw tightly.

WARNING! To avoid a hazard due to instability of the appliance, it must be fixed in accordance with the instructions.

The packaging material used is recyclable; we recommend that you separate plastic, paper and cardboard and give them to recycling companies. To help preserve the environment, the refrigerant used in this product is R134a (Hydrofluorocarbon -HFC), which does not affect the ozone layer and has little impact on the greenhouse effect. According to WEEE (Waste of Electrical and Electronic Equipment) guidelines, waste from electrical and electronic devices should be collected separately. If you need to dispose of this appliance in the future, do NOT throw it away with the rest of your domestic garbage. Instead, please take the appliance to the nearest WEEE collection point, where available.

The product is subject to change without notice.
